INTRODUCTION TO GITHUB

- GitHub is a cloud-based platform for storing and managing code.
- It helps developers collaborate on projects.
- GitHub uses Git for version control.

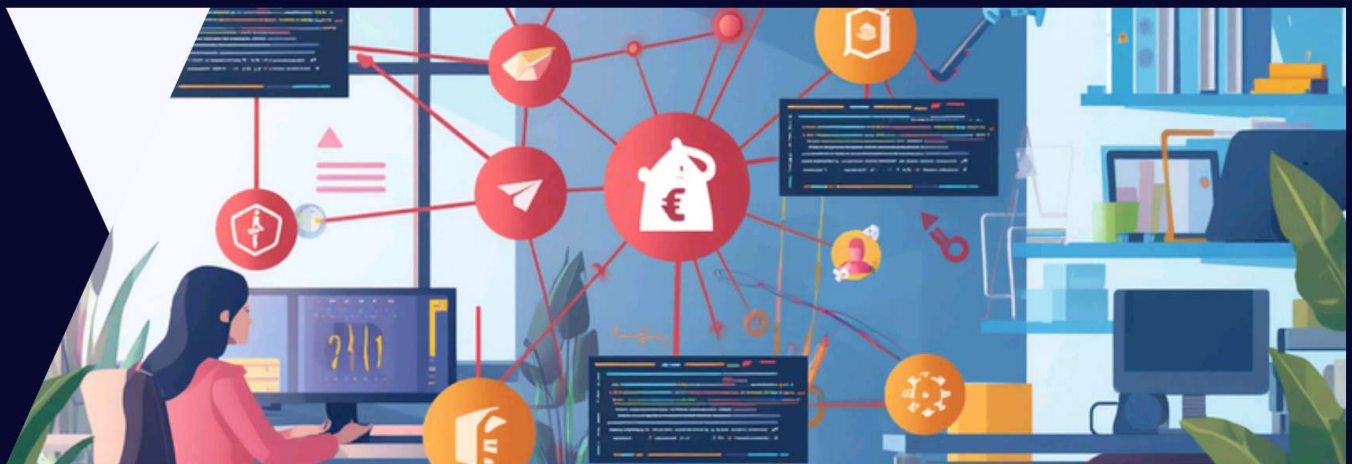

History of GitHub

- GitHub was launched in 2008.
- Acquired by Microsoft in 2018.
- Widely used for software development.

What is Git?

- Git is a distributed version control system.
- Tracks file and code changes.
- Supports teamwork and collaboration.

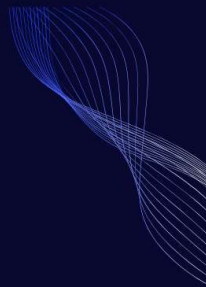

Features of GitHub

- 2 [Version control](#)
- 3 [Pull requests](#)
- 4 [Issue tracking](#)
- 5 [GitHub Actions](#)

GitHub Account Creation

- Open github.com
 - Click Sign Up
- Enter details and verify account
- Complete setup process

Repository

- A repository stores project files.
- Contains code, images, and documents.
- Can be public or private.

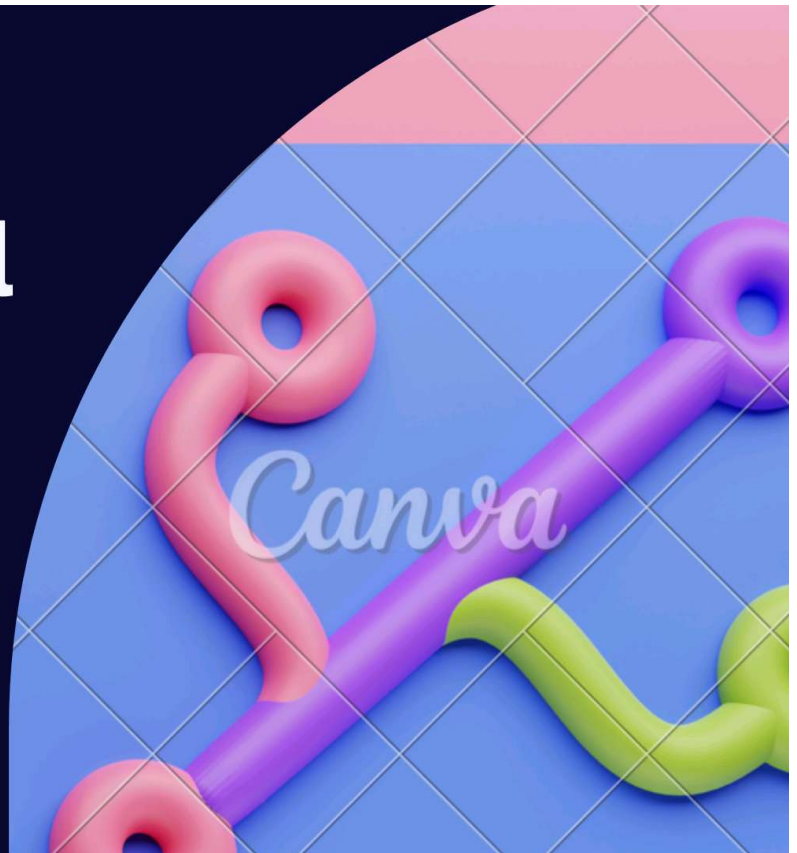

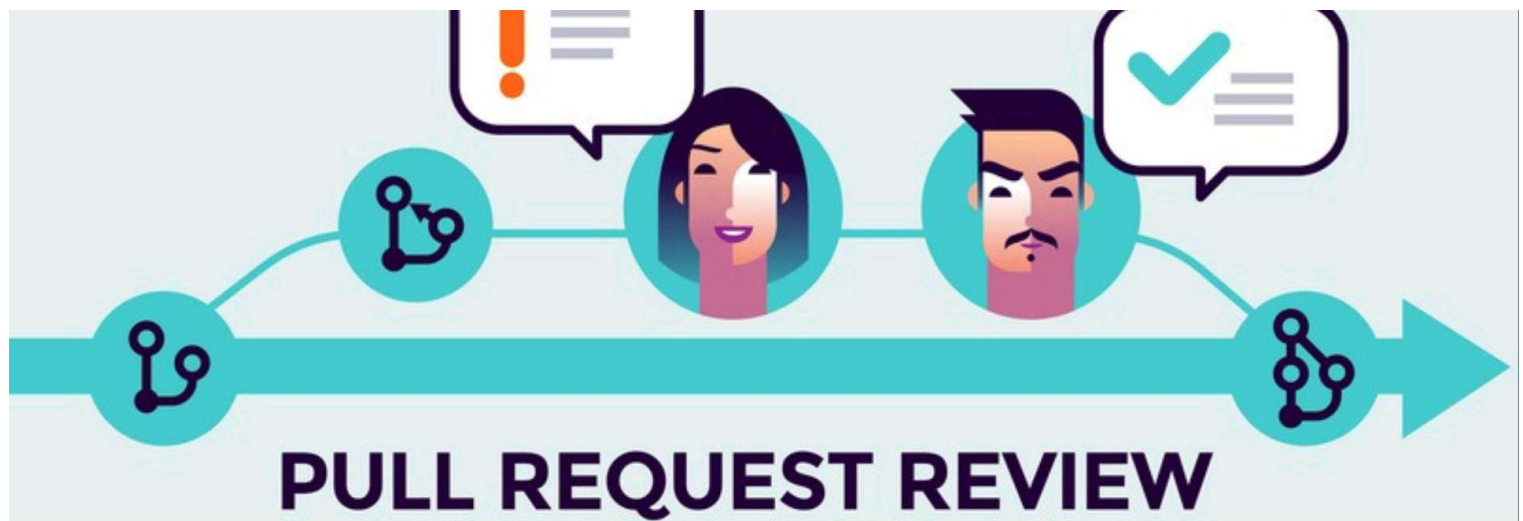

Branches

- Branches are separate versions of a project.
- Used for testing features safely.
- Default branch is usually main

Commit, Push and Pull

- Commit saves changes.
- Push uploads changes to GitHub.
- Pull downloads latest changes.

Fork and Pull Request

- Fork creates a copy of a repository.
- Pull Request helps merge changes.
- Useful in open-source projects.

GitHub Actions

- Automation tool in GitHub.
- Used for testing and deployment.
- Improves workflow efficiency.

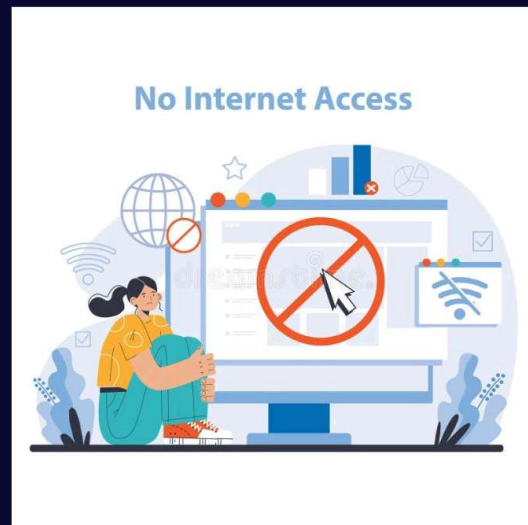

Advantages of GitHub text

- Easy collaboration
 - Secure backup
- Project management
- Open-source learning

Disadvantages of GitHub

- Requires internet access
- Git commands may be difficult for beginners
- Some free plan limitations

Applications of GitHub

- Software development
- Web development
- Portfolio showcase
- Team collaboration

Common Git Commands

- git init
- git add.
- git commit -m "message"
- git push
- git pull

Conclusion

- GitHub is important for developers.
- Helps manage and share projects.
 - Widely used in the IT industry.

An abstract digital graphic featuring a dark blue background. Overlaid on this background is a complex pattern of thin, horizontal and vertical lines in shades of purple and teal. Interspersed among these lines are small, solid-colored squares in the same color palette, creating a pixelated or glitch-like effect. The overall composition is centered horizontally and vertically.

Thank you
